

AseptiQuik G[®]

Series Connectors

AseptiQuik[®] G Connectors enable quick and easy sterile connections, even in non-sterile environments. The easy-to-use genderless design simplifies system integration and minimizes the risk of operator error. The connectors' robust construction provides enhanced user confidence and reliable performance without the need for clamps, fixtures or tube welders. Biopharmaceutical manufacturers benefit from a full range of interchangeable 1/4" to 1-1/2" termination solutions with the quality and market availability they expect from the leader in single-use connection technology.

FEATURES	BENEFITS
✓ Genderless	Eases single-use systems specifications with one-part number for both halves
✓ FLIP-CLICK-PULL	Intuitive three-step connection process reduces risk of operator error
✓ CPC Click	Audible confirmation of connection with no additional hardware required
✓ Chemical Compatibility and pH Range	AseptiQuik PPSU enables genderless connection for a greater range of chemical applications, offering versatile connections across downstream processes with a pH range from 2 to 12
✓ BPA-free	AseptiQuik PPSU meets a broader range of Application Requirements

TYPICAL FLOW RATE

Cv Value Range: 1.5 - 31

Cv values represent the approximate expected flow rate in gallons per minute of water at room temperature for a 1 PSI pressure drop. The flow is generally constrained by the smallest diameter, which in some cases will be the termination diameter and not the Nominal Flow Path.
